SKILLS

Backend

Java (Spring Boot)
Django (Python)
REST API design
Hibernate / JPA

Frontend

Angular
Type Script
HTML5 / CSS3

Infrastructure & DevOps

Linux (Ubuntu)
Nginx (reverse proxy, SSL)
Docker / DockerCompose
Basic CI / CD
Git
VPS deployment
SSL / TLS
Stripe webhooks
Environment configuration
Production debugging

Databases

MongoDB
PostgreSQL
SQL

CMS & Systems

WordPress
Joomla
Windows Server

AI & Automation

Claude / Cursor / Codex
Prompt engineering
Code gen & debugging
AI refactoring
Rapid prototyping with AI

WORK EXPERIENCE

Digital Accessibility Coordinator (IT Specialist / Developer) 09/2025-12/2025
University of Siedlce

- Designed, developed, and maintained scalable Django-based web applications supporting both public-facing and internal university platforms, aligned with institutional and regulatory requirements.
- Administered and optimized Linux (Ubuntu) server environments across development, staging, and production, ensuring high availability and system stability.
- Configured and managed Nginx web servers, including SSL/TLS certificate management, secure reverse proxy architectures, and performance tuning.
- Deployed, containerized, and orchestrated applications using Docker and Docker Compose, managing multi-service stacks (Django, PostgreSQL, Redis, Nginx) in production environments.
- Implemented and supported multilingual web platforms leveraging Django internationalization (i18n), including translation workflows with .po/.mo files and locale management.
- Ensured full compliance with web accessibility and public-sector standards, including WCAG 2.1 / 2.2 and EN 301 549, supporting EU digital accessibility requirements.
- Maintained, secured, and optimized CMS platforms (WordPress, Joomla), including core/plugin updates, access control, content management, and security hardening.
- Performed production incident analysis, troubleshooting, and root cause resolution, minimizing downtime and improving system reliability.
- Collaborated using Git-based version control workflows, including feature branching, code reviews, and controlled deployments.
- Produced technical documentation, system reports, and compliance-ready materials for internal stakeholders and external audits.

HOBBIES

Side projects & automation
Workflow optimization
Cybersecurity exploration
Gaming (strategy & competitive)
Problem-solving & system thinking
Gym

EDUCATION

Bachelor degree

The John Paul II Catholic
University of Lublin

2020-2023

Computer Science

Master's degree

The John Paul II Catholic
University of Lublin

2023-2025

Computer Science

LANGUAGES

English

Polish

PROJECTS

- Universal cookie banner for multiple websites example on <https://www.uws.edu.pl>
- Update and bugfixing for <https://welcome.uws.edu.pl/pl/>
- <https://cwn.uws.edu.pl> – development and improvements
- Custom URL shortener system
- Git Hub:
 - E-commerce platform with an intelligent product recommendation Engine: Angular + Spring Boot + MongoDB + Docker
Designed and implemented full-stack application with custom recommendation logic, REST API, authentication, order workflow and Docker-based deployment.
 - Web crawler for automated content extraction and structured JSON export
 - 2D arena game project with combat, movement and item-crafting mechanics
 - Apartment rental application for landlords and tenants
 - ShowTheCash - deployed full-stack payment platform on VPS. Built and deployed a web platform with Stripe Checkout integration, webhook-based payment verification, Dockerized VPS setup, Nginx reverse proxy, SSL, and production-focused backend logic. <https://showthecash.com>
